Summary

I am a Computer Engineering student with a strong passion for creating efficient solutions, clean designs, and addressing real-world problems. My expertise spans C, C++, Java, Python, SQL, and Linux, supported by hands-on project work in DBMS applications and full-stack development. As a collaborative team player, I prioritize effective planning and adaptability in the face of challenges, seeking opportunities to apply my skills and learn from seasoned professionals

Education

Vishwakarma University - VU
Bachelor of Technology - BTech

Pune, Maharashtra, India
08/2023 - 10/2027

Skills

C/C++ • GitHub • IBM • Java • JDBC • Linux • Mind Mapping • Netlify • Python • Servlets • SQL • Gmail

Projects

Expense Manager using Java

Pune, India
03/2025 - 04/2025

Developed a full-stack expense management system using Java Servlets, MySQL, and Apache Tomcat.

- The application allows users to securely register/login, add and categorize expenses, visualize spending trends with Chart.js, and generate HTML/CSV monthly reports.
